Given below are 2 statements. one is labelled as Assertion (A) and other one is labelled as reason (R)

Assertion (A) : The static characteristics of an instrument play a crucial role in determining its accuracy and precision.

Reason (R) : Static characteristics describe the behaviour of an instrument under constant operating conditions, including its sensitivity, linearity, and hysteresis.

In light of the above statements, choose the most appropriate answer from the options given below

1. Both A and R are correct and R is the correct explanation of A
2. Both A and R are correct but R is NOT the correct explanation of A
