

PREVIEW QUESTION BANK

Module Name : VETERINARY SCIENCE-ENG
Exam Date : 09-Jul-2023 Batch : 10:00-12:00

Sr. No.	Client Question ID	Question Body and Alternatives	Marks	Negative Marks
Objective Question				
1	2701	Serous demilunes are present in which of the following gland? 1. Parotid 2. Pancreas 3. Thyroid 4. Mandibular A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
2	2702	Accessory carpal of horse articulates with (A) Radius distal extremity posterior face (B) Radial distal extremity anterior face (C) Ulnar carpal posterior face (D) Intermediate carpal posterior face Choose the correct answer from the options given below: 1. (A) and (D) only. 2. (A) and (C) only. 3. (B) and (C) only. 4. (B) and (D) only. A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
3	2703		4.0	1.00

Match **List I** with **List II**

List I	List II
Stain	Used to identify
(A) Janus Green B	(I) Glycogen
(B) Periodic Acid Schiff	(II) Collagen
(C) Sudan III stain	(III) Mitochondria
(D) Masson's Trichome	(IV) Lipids

Choose the **correct** answer from the options given below:

- (A) - (IV), (B) - (II), (C) - (III), (D) - (I)
- (A) - (II), (B) - (I), (C) - (III), (D) - (IV)
- (A) - (III), (B) - (I), (C) - (II), (D) - (IV)
- (A) - (III), (B) - (I), (C) - (IV), (D) - (II)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

4 2704

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Myoepithelial cells force secretory product into duct system.

Reason (R) : Myoepithelial cells are well developed in sweat glands.

In light of the above statements, choose the **most appropriate** answer from the options given below:

- Both (A) and (R) are correct and (R) is the correct explanation of (A).
- Both (A) and (R) are correct but (R) is NOT the correct explanation of (A).
- (A) is correct but (R) is not correct.
- (A) is not correct but (R) is correct.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

4.0 1.00

Objective Question

5	2705	Atlas of ox have (A) Foramen Alare (B) Foramen transversarium (C) Intervertebral foramen (D) Vertebral foramen Choose the correct answer from the options given below: (A), (C) and (D) only. (A), (B) and (D) only. (A), (B), (C) and (D) (B), (C) and (D) only. A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
---	------	---	-----	------

Objective Question

6

2706

4.0

1.00

Match **List I** with **List II**

List I	List II
(Type of Epithelium)	(Name of body part lined by it)
(A) Stratified Squamous	(I) External auditory canal
(B) Simple Squamous	(II) Duct of carpal gland
(C) Stratified Cuboidal	(III) Gall bladder
(D) Simple columnar	(IV) Endocardium

Choose the **correct** answer from the options given below:

- (A) - (I), (B) - (III), (C) - (II), (D) - (IV)
- (A) - (I), (B) - (IV), (C) - (III), (D) - (II)
- (A) - (I), (B) - (IV), (C) - (II), (D) - (III)
- (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

7	2707	Largest cell of erythrocytic series is 1. Rubricyte 2. Reticulocyte 3. Rubriblast 4. Megakaryocyte A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
---	------	--	-----	------

Objective Question

8	2708	The most common cell of connective tissue is 1. Reticular cell 2. Macrophage 3. Fibrocyte 4. Mesenchymal cell A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
---	------	---	-----	------

Objective Question

9	2709		4.0	1.00
---	------	--	-----	------

Sequence of branching in bronchial tree is

- (A) Segmental bronchi
- (B) Lobar bronchi
- (C) Terminal bronchioli
- (D) Respiratory bronchioli

Choose the **correct** answer from the options given below:

1. (A), (B), (C), (D).
2. (B), (A), (C), (D).
3. (B), (A), (D), (C).
4. (A), (B), (D), (C).

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

10 2710

Ovarian bursa is enclosed by

- (A) Mesovarium
- (B) Mesosalpinx
- (C) Proper ligament of ovary
- (D) Mesometrium

Choose the **correct** answer from the options given below:

1. (A), (B) and (C) only.
2. (A), (B) and (D) only.
3. (A), (B), (C) and (D).
4. (A) and (B) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

4.0 1.00

Objective Question

11 2711

4.0 1.00

Match **List I** with **List II**

List I	List II
Foramen	Transmitted structures
(A) Maxillary Foramen	(I) Internal Maxillary artery
(B) Oval Foramen	(II) Mandibular nerve
(C) Supraorbital Foramen	(III) Frontal nerve and vessels
(D) Alar Foramen	(IV) Infraorbital nerve and vessels

Choose the **correct** answer from the options given below:

- (A) - (I), (B) - (II), (C) - (III), (D) - (IV)
- (A) - (I), (B) - (IV), (C) - (III), (D) - (II)
- (A) - (IV), (B) - (II), (C) - (III), (D) - (I)
- (A) - (IV), (B) - (I), (C) - (III), (D) - (II)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

12	2712	In hens egg, the flask shaped white yolk extending from the blastodisc to the centre of the yellow yolk is known as :	4.0	1.00
		- Blastoderm - Chalaza - Latebra - Nuclear of ponder		
		A1 : 1		
		A2 : 2		
		A3 : 3		
		A4 : 4		

Objective Question

13	2713		4.0	1.00
----	------	--	-----	------

Horse ergot is actually rudimentary

1. Metacarpal / Metatarsal pads
2. Carpal / Tarsal Pads
3. Palmar / Plantar digital pad
4. Dorsal / Anterior digital pad

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

14 2714

4.0 1.00

Match **List-I** with **List-II**

List-I	List-II
(A) Reissner membrane	(I) Scala Vestibuli
(B) Tectorial membrane	(II) Malleus
(C) Cupula	(III) Spiral organ
(D) Tympanic membrane	(IV) Ampullary crest

Choose the **correct** answer from the options given below:

1. (A) - (I), (B) - (II), (C) - (III), (D) - (IV)
2. (A) - (I), (B) - (III), (C) - (IV), (D) - (II)
3. (A) - (I), (B) - (II), (C) - (IV), (D) - (III)
4. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

15 2715

4.0 1.00

The cells which participate in the osteogenesis are

- (A) Osteoclasts
- (B) Osteoblasts
- (C) Osteocytes
- (D) Fibrocytes

Choose the **correct** answer from the options given below:

1. (A), (B) and (D) only.
2. (A), (B) and (C) only.
3. (A), (B), (C) and (D).
4. (B) and (C) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

16 2716

Expend cardiac tube portion of developing heart contains following structures craniocaudally after truncus arteriosus

- (A) Atrium
- (B) Ventricle
- (C) Bulbus cordis
- (D) Sinus venosus

Choose the **correct** answer from the options given below:

1. (A), (B), (C), (D).
2. (A), (C), (B), (D).
3. (C), (B), (A), (D).
4. (C), (B), (D), (A).

A1 : 1

A2 : 2

A3 : 3

A4 : 4

4.0 1.00

Objective Question

17 2717

4.0 1.00

Sequence of events in the formation of eye are

- (A) Formation of optic grooves
- (B) Optic vesicles formation
- (C) Optic cup formation
- (D) Formation of lens placodes

Choose the **correct** answer from the options given below:

- 1. (A), (B), (C), (D).
- 2. (A), (C), (B), (D).
- 3. (A), (B), (D), (C).
- 4. (A), (D), (C), (B).

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

18 2718

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Sweeney or loose shoulder is a condition where scapula is held away from body.

Reason (R) : Radial nerve paralysis causes sweeney.

In light of the above statements, choose the **correct** answer from the options given below.

- 1. Both (A) and (R) are true and (R) is the correct explanation of (A).
- 2. Both (A) and (R) are true and (R) is **NOT** the correct explanation of (A).
- 3. (A) is true but (R) is false.
- 4. (A) is false but (R) is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

4.0 1.00

Objective Question

19 2719

4.0 1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Excessive craniocaudal movement of the tibia relative to femur is called cranial drawer.

Reason (R) : Cranial drawer occurs due to rupture of cruciate ligament.

In light of the above statements, choose the **correct** answer from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A).
2. Both (A) and (R) are true and (R) is not the correct explanation of (A).
3. (A) is true but (R) is false.
4. (A) is false but (R) is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

20 2720

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Optic grooves are primordia for ocular development.

Reason (R) : Optic groove appear at the end of neurulation prior to closure of the rostral neuropore.

In light of the above statements, choose the **correct** answer from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A).
2. Both (A) and (R) are true and (R) is **NOT** the correct explanation of (A).
3. (A) is true but (R) is false.
4. (A) is false but (R) is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

4.0 1.00

Objective Question

21 2721

4.0 1.00

Vibrio cholerae is a Gram negative bacteria. Based on the name and the staining character of the bacterium, what is it's shape and colour when observed under microscope?

1. Spherical shape; pink colour
2. Spherical shape; violet colour
3. Conical shape; pink colour
4. Comma shape; pink colour

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

22 2722

Which of the following poxvirus infections is NOT an animal pox?

1. Cowpox
2. Contagious ecthyma or Orf
3. Chickenpox
4. Buffalopox

A1 : 1

A2 : 2

A3 : 3

A4 : 4

4.0 1.00

Objective Question

23 2723

How does an antibiotic penicillin work against bacteria?

1. Inhibit overall DNA synthesis
2. Selectively inhibit bacterial DNA synthesis
3. Inhibit peptidoglycan synthesis
4. Does not affect bacteria

A1 : 1

A2 : 2

A3 : 3

4.0 1.00

A4 : 4

Objective Question

24	2724	Which of the following statements is INCORRECT with respect to Bovine Herpesvirus-1 (BoHV-1) infection? 1. BoHV-1 infection cause Infectious bovine rhinotracheitis 2. BoHV-1 infection cause Infectious pustular vulvovaginitis 3. BoHV-1 cause latent infection and the virus persists in nerve ganglia with recrudesence after stress and/or immunosupression 4. BoHV-1 infection does not affect pregnant animals A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
----	------	--	-----	------

Objective Question

25	2725	Which of the following structural component is found in all animal viruses? 1. Envelope 2. DNA 3. Nucleocapsid 4. Spikes A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
----	------	--	-----	------

Objective Question

26	2726		4.0	1.00
----	------	--	-----	------

Read the following statements about **immunoglobulin M (IgM)**

- (A) IgM is the initial antibody produced during immune response to a foreign pathogen.
- (B) IgM is a pentamer joined by J-chain with 10 F(ab) fragments and 10 paratopes
- (C) Very high IgM levels are found in a group of primary immunodeficiencies characterized by susceptibility to infections and malignancies
- (D) IgM cross placenta from mother to fetus and thus protects newborn progeny from intrauterine infections

Choose the **correct** answers from the options given below:

- 1. (A), (B) and (D) only.
- 2. (A), (B) and (C) only.
- 3. (B), (C) and (D) only.
- 4. (A), (C) and (D) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

27 2727

4.0 1.00

Match **List I** with **List II**

List I	List II
(Name of the Specific Diagnostic test)	(Name of the disease for which the test is employed)
(A) Milk Ring Test (MRT)	(I) Streptococcal Mastitis
(B) Ascoli's Precipitation test	(II) Bang's Disease
(C) Mallin test	(III) Anthrax
(D) CAMP test	(IV) Glanders

Choose the **correct** answer from the options given below:

- 1. (A) - (IV), (B) - (I), (C) - (II), (D) - (III)
- 2. (A) - (III), (B) - (I), (C) - (II), (D) - (IV)
- 3. (A) - (II), (B) - (III), (C) - (IV), (D) - (I)
- 4. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

28 2728

4.0 1.00

Given below are two statements

Statement (I) : Phagocytosis is a cellular process for ingesting and eliminating particles, including foreign substances, microorganisms, and apoptotic cells.

Statement (II) : The process of phagocytosis involves several sequential steps, namely, Particle recognition, Particle ingestion, Phagosome formation, Phagolysosome formation and digestion

In light of the above statements, choose the *most appropriate* answer from the options given below.

1. Both **Statement (I)** and **Statement (II)** are true
2. Both **Statement (I)** and **Statement (II)** are false
3. **Statement (I)** is true and **Statement (II)** is false
4. **Statement (I)** is false and **Statement (II)** is true

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

29 2729

4.0 1.00

Peptidoglycan is a complex polymer of sugars and amino acids; the substance from which bacterial cell walls are made. Choose set of correct statements below with respect to peptidoglycan

- (A) A rigid layer of peptidoglycan consist of NAG and NAM which is crosslinked by short peptides
- (B) Antibiotics including penicillin does not inhibit peptidoglycan synthesis
- (C) Gram positive bacteria contain thick layer of peptidoglycan
- (D) Gram negative bacteria have less peptidoglycan

Choose the *correct* answer from the options given below:

1. (A), (B) and (D) only.
2. (A), (B) and (C) only.
3. (B), (C) and (D).
4. (A), (C) and (D) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

30 2730

4.0 1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Allergy to penicillin is example of Type 1 hypersensitivity and may be sometimes with fatal outcome.

Reason (R) : Type 1 hypersensitivity is mediated by IgE and Mast cell which undergo degranulation leading to heavy release of histamine that cause vasodilation

In light of the above statements, choose the *correct* answer from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A).
2. Both (A) and (R) are true but (R) is **NOT** the correct explanation of (A).
3. (A) is true but (R) is false.
4. (A) is false but (R) is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

31 2731

4.0 1.00

The broad functions of the complement system are mentioned below. Choose the set of correct statements

- (A) Activation of complement cascade and thereby mediate inflammation
- (B) Direct killing of target cells/microbes by lysis
- (C) Do not bind with apoptotic cells and antigen antibody complex
- (D) Opsonization (labeling) of pathogens and cells for clearance/destruction

Choose the **correct** answer from the options given below:

- 1. (A), (B) and (D) only.
- 2. (A), (C) and (D) only.
- 3. (B), (C) and (D).
- 4. (A), (B) and (C) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

32 2732

Process of antibody formation is a slow-acting, long-lasting, and more specific adaptive immune response. The adaptive immune response in B cells, Helper T cells and Cytotoxic T cells involve four phases mentioned below. Arrange these phases according to the order of occurrence from first to last.

- (A) Activation: Activation responses involve both changes in gene expression and in the initiation of cell division.
- (B) Memory: Long-lived, pre-activated immune cells that wait for a subsequent infection are formed in the memory phase of the adaptive immune response.
- (C) Encounter: Cells must first encounter antigens by binding specifically to them using specialized membrane proteins.
- (D) Attack: The immune cells attack invading pathogens or infected cells.

Choose the **correct** answer from the options given below:

- 1. (A), (B), (C), (D).
- 2. (D), (C), (A), (B).
- 3. (B), (A), (D), (C).
- 4. (C), (A), (D), (B).

A1 : 1

A4 : 4

Objective Question

35 2735

4.0 1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Mismatched blood transfusion is adverse reaction of Type 2 complement mediated cytotoxic hypersensitivity.

Reason (R) : Natural killer cells play a role in destruction of transformed cells.

In light of the above statements, choose the **correct** answer from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A).
2. Both (A) and (R) are true and (R) is **NOT** the correct explanation of (A).
3. (A) is true but (R) is false.
4. (A) is false but (R) is true.

A4 : 4

Objective Question

38 2738

4.0 1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Human immunodeficiency virus (HIV) infections affecting WBCs is a cause of Acquired immunodeficiency syndrome (AIDS) and death

Reason (R) : The disease causing intrinsic factors are present within the body of host such as malfunctioning of immune system resulting in immunodeficiency disease and host may die due to secondary bacterial infection

In light of the above statements, choose the **correct** answer from the options given below.

- Both (A) and (R) are true and (R) is the correct explanation of (A).
- Both (A) and (R) are true but (R) is **NOT** the correct explanation of (A).
- (A) is true but (R) is false.
- (A) is false but (R) is true.

A3 : 3

A4 : 4

Objective Question

39 2739

4.0 1.00

Necrosis and apoptosis are two mechanisms involved in cell death in multicellular organisms. Choose statements that are TRUE for necrosis from the following statements:

- (A) Naturally occurring physiological process of premature cell death.
- (B) Pathological process caused by cell injury due to toxins, trauma and infections.
- (C) Unregulated and accidental cell death.
- (D) Always harmful to the organism.

Choose the **correct** answer from the options given below:

- 1. (A), (B) and (C) only.
- 2. (A), (B) and (D) only.
- 3. (A), (C) and (D) only.
- 4. (B), (C) and (D) only.

Objective Question

85 2785

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Canine atopic dermatitis is characterized as a genetically predisposed tendency to develop IgE antibodies to environmental allergens, leading to a characteristic inflammatory and pruritic skin disease.

Reason (R) : Abnormality in the ratio between T helper 1 (TH1) cells and T helper 2 (TH2) cells is one of the causes of atopic dermatitis in dogs

In light of the above statements, choose the **correct** answer from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A).
2. Both (A) and (R) are true but (R) is **NOT** the correct explanation of (A).
3. (A) is true but (R) is false.
4. (A) is false but (R) is true.
